

One to three years

Posted by priyankavarude@gmail.com - 21 Apr 2015 10:12

By their first birthday, babies can:

move around, either by crawling or shuffling or some

may be standing with support and a small number walking alone

sit up alone and feed themselves, at least with their fingers

use their hands skilfully to move and arrange objects including dropping things on the floor and looking to see

where they are

wave 'bye bye' and point at things with their fingers

communicate by babbling and saying two syllable

words like 'dada' understand the world around them

know who their main carers are and cry if they are left with someone they do not know.
